## MEMBER METER POLE

Be sure all items shown below are on the meter pole before contacting the office for connection of electric service.

A Touchstone Energy ${ }^{\circ}$ Cooperative $\times$ 而
Phone: 817.444.3201 $\star$ tcectexas.comCorrect meter baseConduit extended to height of 6 ' 5 " above top of meter base

- On 100-AMP service: 1 1/4" EMT conduit
- On 200-AMP service: 2" EMT conduitWeatherheadCorrect copper wire size must be used between the weatherhead and the line side of the meter base and from the load side of the meter base to the main disconnect:
- 100-AMP service: \#2 copper or $2 / 0$ aluminum on both line and neutral
- 200-AMP service: $2 / 0$ copper or $4 / 0$ aluminum on both line and neutralMain disconnect no larger than rating on meter baseGround wire clamped to ground rodNeutral wire markedMeter loop must be faced in a direction that will allow easy access

## NOTES:

1. Service drop provided and installed by Tri-County Electric Co-op
2. Service attachment provided and installed by Tri-County Electric Co-op
3. Meter sockets must conform to specifications furnished by Tri-County Electric Co-op
4. Service entrance conductor's and service raceway provided and installed by member. Conductors extend 36 " minimum outside of weatherhead. Neutral wire must be properly identified
5. Members provide and install conduit straps and meter socket. Creosote pole or equal to be a minimum diameter of 6 " at top of pole and a minimum height of $17^{\prime}$. Drop loop minimum clearance is $10^{\prime}$ from finished grade.
6. Pole to be set a minimum depth of $4^{\prime}$ with tamped earth or concrete as backfill
7. Member installation must comply with National Electric Code and applicable city ordinance
8. Plastic (PVC) conduit and clamps will not be accepted for use between the main disconnect, meter base, and weatherhead.
9. If a request is made to connect service and the member meter pole fails to meet required specifications, Tri-County Electric Co-op will not connect service and the member will be billed additional trip charge to connect service once corrections have been made.
10. A \#6 copper bond wire must be installed between the breaker box and meter base. An external breaker below or beside the meter base is required if the distance between meter base and panel exceeds 3 feet. Refer to Meter Can Bonding spec
