ESTIMATED LOAD GUIDE

<u>Total Site Load</u>	The estimated load for the residence in kW
<u>Total DG Output</u>	The total output of all inverters to be installed including any inverter tied to battery power in kW
<u>Battery Capacity</u>	The energy rating of the batteries to be installed in kWh
<u>Battery Continuous Output Power</u>	The output power of the inverter(s) that are only battery coupled on the DC side in KW
<u>Inverter Continuous Output Power</u>	The output of the inverter(s) used for solar or wind

For any questions regarding the solar program, please contact the Engineering team at distributedgeneration@tcectexas.com or 817.752.8119
